F 4 10 / 3 6 0

The model F410/360, with 7.5 kW electric power, can be used to process high quantity of food waste: for this reason, it is more suitable for large cruise ships.

The compact size and footprint allows the F410/360 to be easily installed on board ship.

15 mm thickness

Safety System

Main Features

- © The two shredders S3/3N and F 410/360 are supplied with Declaration of Compliance with MARPOL 73/78, Annex V certified by an International Body.

This "Regulation for the prevention of pollution by garbage (organic fraction) from ships requires that "such comminuted or ground garbage shall be capable of passing through a screen with openings no greater than 25 mm" in case these garbage should be discharged into the sea.

The shredders proposed by SATRINDTECH can offer a cost effective solution to shipowners wherever they are in the necessity to dispose food waste into the deep sea.

S 3 / 3 N

The model S3/3N, with 3 kW electric power, designed to process small quantities of material, is equipped with a support for 80 liters containers mounted on wheels.

Moreover a hopper with a special feeding system that allows the operator to load the material in complete safety is provided.
